

SMETA Corrective Action Plan Report (CAPR)

Version 6.1

Audit Content:

(1) A SMETA audit was conducted which included some or all of Labour Standards, Health & Safety, Environment and Business Ethics. The SMETA Best Practice Version 6.1 (March 2019) was applied. The scope of workers included all types at the site e.g. direct employees, agency workers, workers employed by service providers and workers provided by other contractors. Any deviations from the SMETA Methodology are stated (with reasons for deviation) in the SMETA Declaration.

(2) The audit scope was against the following reference documents

2-Pillar SMETA Audit

- ETI Base Code
- SMETA Additions
 - Universal rights covering UNGP
 - Management systems and code implementation,
 - Responsible Recruitment
 - Entitlement to Work & Immigration,
 - Sub-Contracting and Home working,

4-Pillar SMETA

- 2-Pillar requirements plus
- Additional Pillar assessment of Environment
- Additional Pillar assessment of Business Ethics
- The Customer's Supplier Code (Appendix 1)

(3) Where appropriate non-compliances were raised against the ETI code / SMETA Additions & local law and recorded as non-compliances on both the audit report, CAPR and on Sedex.

(4) Any Non-Compliance against customer code shall not be uploaded to Sedex. However, in the CAPR these 'Variances in compliance between ETI code / SMETA Additions/ local law and customer code' shall be noted in the observations section of the CAPR.

Guidance

The Corrective Action Plan Report summarises the site audit findings and a corrective, and preventative action plan that both the auditor and the site manager believe is reasonable to ensure conformity with the ETI Base Code, Local Laws and additional audited requirements. After the initial audit, the form is used to record actions taken and to categorise the status of the non-compliances.

N.B. observations and good practice examples should be pointed out at the closing meeting as well as discussing non-compliances and corrective actions.

To ensure that good practice examples are highlighted to the supplier and to give a more 'balanced' audit a section to record these has been provided on the CAPR document (see following pages) which will remain with the supplier. They will be further confirmed on receipt of the audit report.

Root cause (see column 4)

Root cause refers to the specific procedure or lack of procedure which caused the issue to arise. Before a corrective action can sustainably rectify the situation, it is important to find out the real cause of the non-compliance and whether a system change is necessary to ensure the issue will not arise again in the future.

See SMETA BPG Chapter 7 'Audit Execution' for more explanation of "root cause".

Next Steps:

1. The site shall request, via Sedex, that the audit body upload the audit report, non-compliances, observations and good examples. If you have not already received instructions on how to do this then please visit the web site www.sedexglobal.com.
2. Sites shall action its non-compliances and document its progress via Sedex.
3. Once the site has effectively progressed through its actions then it shall request via Sedex that the audit body verify its actions. Please visit www.sedexglobal.com web site for information on how to do this.
4. The audit body shall verify corrective actions taken by the site by either a "Desk-Top" review process via Sedex or by Follow-up Audit (see point 5).
5. Some non-compliances that cannot be closed off by "Desk-Top" review may need to be closed off via a "1 Day Follow Up Audit" charged at normal fee rates. If this is the case, then the site will be notified after its submission of documentary evidence relating to that non-compliance. Any follow-up audit must take place within twelve months of the initial audit and the information from the initial audit must be available for sign off of corrective action.
6. For changes to wages and hours to be correctly verified it will normally require a follow up site visit. Auditors will generally require to see a minimum of two months wages and hours records, showing new rates in order to confirm changes (note some clients may ask for a longer period, if in doubt please check with the client).

Local Law Issues

Issue	Description
§1	In accordance with the Regulation on Protection of Buildings Against Fire (19.12.2007), art 75 (1) Fire detection and warning system which is activated by manually, automatically or by warning received from a fire extinguishing system. (2) Manual fire warning is conducted with fire warning buttons. Fire warning buttons are placed on fire escape routes in the facility. Distance between fire warning button in each floor and from any point on the floor will not exceed 60 m. All fire alarm buttons will be accessible and placed from ground at least 110 cm and at most 130 cm. Art 81 (1) Processes to warn people in the building from any emergency situation can be performed by audible and visual alarm equipments
§2	In accordance with Turkish Regulation about Occupational Health and Safety circumstances using work equipments (25/04/2013) No: 28628 Addition III - Related Matters for Maintenance, Repairs and Periodical Checks Art 2.2.3 Periodical check period and check criteria for lifting and transfer tools are stated on Table 2 provided that the criteria stated in Art 2.1.1 are reserved. Table 2 Equipment : Lift(Man lift, Goods Lift), Forklift, Transpallet, Lifting or transferring tools Check Period(Max): 1 year Art.1.9. In case when non-compliance points are detected in terms of occupational health and safety and operating of the work equipment is inappropriate if these points are not corrected; the work equipment shall not be used until these points are corrected.

§3	In accordance with Occupational Health and Safety Law, 20/06/2012, No: 6331, Article 10; (1) Employer should provide risk assessment regarding the occupational health and safety. In the risk assessment, the issues listed below should be considered; a) The situation of the employees who could be affected by certain risks. b) The choice of the work equipment and chemical substances to be used. c) Organization and order in the workplace d) The situation of the employees who requires special policies as young employees, elders, handicapped employees and breast feeding employees, and of the female employees. (2) Employer determines occupational health and safety measurement to be taken and protective equipment. (3) The occupational health and safety measurement to be taken, working practices and production methods in the workplace should increase the degree of the protection regarding the employees' health and safety, and should be applicable at every level of workplace's administrative structure. (4) Employer ensures that required controls, measurements, examinations and researches are done to define the risks to which the employees are exposed in workplace regarding the occupational health and safety.
§4	In accordance with the Turkish Regulation on the Health and Safety Precautions Taken While Working with the Chemical Substances (12.08.2013) No: 28733 Art. 8 - (1) Employer shall take into consideration following issues in accordance with Regulation on Emergency Cases dated 18.06.2013 and No. 26861 for emergency cases which will be caused by chemical substances. a) Preventive precautions against negative impacts of emergency cases are taken immediately and employees are informed. Necessary actions are taken to return the emergency cases to normal within the shortest time
§5	In accordance with Turkish Regulation about Occupational Health and Safety circumstances using work equipments (25/04/2013) No: 28628 Addition III - Related Matters for Maintenance, Repairs and Periodical Checks Art 2.3.1 Unless otherwise specified in the relevant standards, periodic inspections of the installations are carried out annually. Periodical check period and check criteria for some installments are stated on Table 3 provided that the criteria stated in Art 2.1.1 are reserved. Table 3 Equipment: Fire fighting installment, Hoses, Motopumps, Pipe Systems Check Period (Max): 1 year
§6	Turkish Regulation about Occupational Health and Safety circumstances using work equipments (25/04/2013) No: 28628 Addition III - Related Matters for Maintenance, Repairs and Periodical Checks Art 2.3. installations 2.3.1. Unless otherwise specified in the relevant standards, periodic inspections of installations shall be carried out annually. 2.3.4 (Amended phrase: RG-23/7/2016-29779) Without prejudice to the criteria mentioned in Article 2.3.1, periodic control criteria and control periods of some installations are given in Table 3. Table-3: Periodic control periods and control criteria of the installations (Supplementary Title: RG-23/7/2016-29779) (2)
§7	In accordance with Turkish Regulation about Occupational Health and Safety circumstances using work equipments (25/04/2013) No: 28628 Addition III - Related Matters for Maintenance, Repairs and Periodical Checks Art 2.3.4 Periodical check period and check criteria for some installments are stated on Table 3 provided that the criteria stated in Art 2.1.1 are reserved. Table 3 Equipment: Electricity Installments, Grounding Installments, Lightning Rod Check Period (Max): 1 year
§8	Regulation about the obligatory permits and licenses according to the Environment Law(29.04.2009) No: 27214, Article 4; facilities subject to environment permit or to environment permit and license are classified as below regarding to their impact to environment; 1- Facilities which have contaminating impact to environment at high level (Appendix 1) 2- Facilities which have contaminating impact to environment (Appendix 2) Facilities which listed at Appendix 1 or 2 are required to obtain environment permit or to environment permit and license.
§9	Regulation for facility opening and operating permit (10/8/2005), II. Section Art 6 (Changed first clause: 19/3/2007 – 2007/11882 K.) – A workplace cannot be opened and operated without obtaining a business and working license duly from the competent authorities.

Local law issue	In accordance with Occupational Health and Safety Law, 20/06/2012, No: 6331, Article 10; (1) Employer should provide risk assessment regarding the occupational health and safety. In the risk assessment, the issues listed below should be considered; a) The situation of the employees who could be affected by certain risks. b) The choice of the work equipment and chemical substances to be used. c) Organization and order in the workplace d) The situation of the employees who requires special policies as young employees, elders, handicapped employees and breast feeding employees, and of the female employees. (2) Employer determines occupational health and safety measurement to be taken and protective equipment. (3) The occupational health and safety measurement to be taken, working practices and production methods in the workplace should increase the degree of the protection regarding the employees' health and safety, and should be applicable at every level of workplace's administrative structure. (4) Employer ensures that required controls, measurements, examinations and researches are done to define the risks to which the employees are exposed in workplace regarding the occupational health and safety.																										
ETI code	3.1 - A safe and hygienic working environment shall be provided, bearing in mind the prevailing knowledge of the industry and of any specific hazards. Adequate steps shall be taken to prevent accidents and injury to health arising out of, associated with, or occurring in the course of work, by minimising, so far as is reasonably practicable, the causes of hazards inherent in the working environment.																										
Explanation to the non compliance	According to document review and management declaration, risk assessment were conducted on 8.2.2021. However, risk assessment was not conducted																										

	for disabled employees, foreigner employees, old employees and young employees who under 18 are.// Doküman incelemesi ve yönetim beyanına göre 8.2.2021 tarihinde risk değerlendirmesi yapılmıştır. Ancak engelli çalışanlar, yabancı çalışanlar, yaşlı çalışanlar ve 18 yaşından küçük genç çalışanlar için risk değerlendirmesi yapılmamıştır.

SMETA Declaration

I declare that the audit underpinning the following report was conducted in accordance with SMETA Best Practice Guidance and SMETA Measurement Criteria.

- (1) Where appropriate non-compliances were raised against the ETI code / SMETA Additions & local law and recorded as non-compliances on both the audit report, CAPR and on Sedex.
- (2) Any Non-Compliance against customer code alone shall not be uploaded to Sedex. However, in the CAPR these 'Variances in compliance between ETI code / SMETA Additions/ local law and customer code' shall be noted in the observations section of the CAPR.

Auditor Team			
Lead Auditor:	MELİS OKTAY	APSCA Number:	32200319
Additional Auditors:	nurselin aras		
Date of declaration:	2023-08-15		

Note: The focus of this ethical audit is on the ETI Base Code and local law. The additional elements will not be audited in such depth or scope, but the audit process will still highlight any specific issues.

Site Representation	
Full Name:	AYSE NUR DONMEZ
Title:	LEAN PRODUCTIVITY SPECIALIST
Date of declaration:	2023-08-15
Comments: <i>Any exceptions to this must be recorded here (e.g. different sample size): Sampled wage records from the past 5 months were provided for review (5 months only since the operation for digital thermometer just started last Sep 2020). The audit took 2.0 man-days (9AM-6PM per day). Audit time was extended until 8PM due to the extent of documentation; this was agreed upon with the factory representatives</i>	
1 administrative employee was included to worker interview.	

Guidance on Root Cause

Explanation of the Root Cause Column

If a non-compliance is to be rectified by a corrective action which will also prevent the non-compliance re-occurring, it is necessary to consider whether a system change is required.

Understanding the root cause of the non-compliance is essential if a site is to prevent the issue re-occurring.

The root cause refers to the specific activity/ procedure or lack of activity /procedure which caused the non-compliance to arise. Before a corrective action can rectify the situation, it is important to find out the real cause of the non-compliance and whether a system change is necessary to ensure the issue will not arise again in the future.

Since this is a new addition, it is not a mandatory requirement to complete this column at this time. We hope to encourage auditors and sites to think about Root Causes and where they are able to agree, this column may be used to describe their discussion.

Some examples of finding a “root cause”

Example 1

Where excessive hours have been noted the real reason for these needs to be understood, whether due to production planning, bottle necks in the operation, insufficient training of operators, delays in receiving trims, etc.

Example 2

A non-compliance may be found where workers are not using PPE that has been provided to them. This could be the result of insufficient training for workers to understand the need for its use; a lack of follow-up by supervisors aligned to a proper set of factory rules or the fact that workers feel their productivity (and thus potential earnings) is affected by use of items such as metal gloves.

Example 3

A site uses fines to control unacceptable behaviour of workers.

International standards (and often local laws) may require that workers should not be fined for disciplinary reasons.

It may be difficult to stop fines immediately as the site rules may have been in place for some time, but to prevent the non-compliance re- occurring it will be necessary to make a system change.

The symptom is fines, but the root cause is a management system which may break the law. To prevent the problem re-occurring it will be necessary to make a system change for example the site could consider a system which rewards for good behaviour

Only by understanding the underlying cause can effective corrective actions be taken to ensure continuous compliance.

The site is encouraged to complete this section so as to indicate their understanding of the issues raised and the actions to be taken.
