FSC Certified Notebook: The Intersection of Sustainability and Elegance

FSC (Forest Stewardship Council) is an international certification system that promotes sustainable forest management worldwide. Products with this certification ensure that raw material sourcing and production processes are carried out without harming forests. It is an important certification for protecting forest biodiversity and respecting the rights of local communities. For paper-based products like notebooks, FSC certification guarantees that the production process does not harm the environment, that natural resources are used efficiently, and that forests are preserved.

The Whisper of the Forests

Sustainable Eco-Friendly Notebooks

Every Page Holds
A Sustainable Future!

FSC (Forest Stewardship Council) certified products are made from materials that support environmentally friendly and sustainable forest management. FSC certified notebooks contribute to the protection of forests and the preservation of biodiversity while also featuring high-quality paper. These notebooks not only represent a conscious choice for the environment but also provide users with a reliable and quality writing experience. In this regard, at Dival, we produce nature- and human-friendly notebooks using entirely recycled materials, from the cover board to the coating, and from the inner pages to the bookmark ribbons.
